THOUGHT PROCESS

Over the next eight years there are $350B in opportunities which are ripe for collaboration opportunities.

This work can harness contracting preferences that are available to tribes as a potential collaboration partner.

We can also collaborate on worthy new ideas and turn them into significant business opportunities through this work. Think of this as an advanced way to pursue R&D work.

Tribes are now open for business!

NATIVE AMERICAN

Building Business on a Native Platform

BASIC IDEA "NATIVE PLATFORM ECONOMY MODEL" (NPEM)

What kind of collaboration(s) are you interested in? We have four (4) business areas outlined on the website which can serve as starting points for ideas. How may we help you?

Collaborations with us can witness a tribal government serving as a conduit for business developments. We see a real value proposition in empowering business thinkers and investors to maximize their efforts.

ADVANTAGE OF A NATIVE PLATFORM ECONOMY MODEL

Depending on the type of collaborations you need, we can help you leverage a new tribal business license for yourself or your company. This can help drive ROIs which are 15% better than average market conditions. Not to mention, lower tax rates, and in some circumstances, no capital gains taxes.

Please note, some of these techniques are proprietary to our business model, therefore, confidential. We would be glad to share some detailed information in a brief conference call. Touch here to send an email request.

COLLABORATION POTENTIAL

As you think about your collaboration needs, please remember, tribes are located all over the country in 35 individual states. We do have access to millions of acres of land for business developments if that is something you need for a new deal or an expansion effort.

Nationally there are currently 574 tribes in the USA. Many of these tribes have business development opportunities.

SEE HERE FOR A BASIC OVERVIEW OUTLINE.
